Bath & Shower Tray Seal

AquaStrap is a leading up-stand seal used for sealing a shower tray, pan or bath tub. For those people installing a new shower tray or bath who prefer an exposed silicone joint to an extrude profile, AquaStrap will remain watertight in the event of the silicone seal leaking through joint movement or natural deterioration.

Our seals accommodate the technical challenges of modern hi-use, hi-performance shower environments, the aesthetic preferences of our customers and the recommendations of recognised national building standards worldwide.
