THE AIRE PLUS OUTDOOR TV RANGE

Available as:

FANLESS OUTDOOR ENCLOSURE

The unit is made of aluminium avoiding the need for noisy fans like other products on the market. Our system uses a unique fanless temperature control system.

ANTI-REFLECTIVE SCREEN AND HIGH BRIGHTNESS PANEL

With the powerful 1500cd/m2 brightness screen you are able to view in direct sunlight. There is also an anti-glare covering on the front of the screen to prevent glare on a bright sunny day.

SUPER SLIM DESIGN

With a depth from just 69mm and a weight 50% lighter than the average outdoor screen, we offer one of the most compact and attractive solutions on the outdoor market.

LG FULL HD LED COMMERCIAL PANEL

The LED panels we use are from one of the most respected manufacturer of LED panels in the world ensuring we deliver the most reliable and best product on the market to our customers.

THE DURASCREEN OUTDOOR TV RANGE

TOUGHENED GLASS

A robust design and tempered glass makes the Durascreeen Outdoor TV Range one of the toughest outdoor commercial solutions on the market, ideal for public areas where vandalism maybe a concern.

EASY ACCESS FOR MAINTENANCE

Designed with ability to unlock the front panel and gain access to the inside of the unit for easy servicing and upgrading with the view of the long term solution in mind.

FAN COOLING SYSTEM

The commercial model uses built in fans to maintain control of the temperature, an effective solution to prevent the unit from overheating.

BUILT IN SPEAKERS

2 x 15W speakers allow for a fully integrated audio/visual experience. Audio out also available to pair with powerful outdoor speakers.

Packaging Contents

TV Pod Base Unit	x 1
TV Pod Base front case	x 1
Mounting bracket	x 1
Cable running vent	x 2
Airflow vent	x 2

Warranty

2 year limited warranty on electrical components
8 Year limited warranty on back case

ROBUST AND DURABLE

The back case and front cover are made from ABS/ASA (PV) with a professional, sleek finish, rendering them resistant to high impact and scratching.

FULLY SEALED WATERPROOF POD

The sealed TV Pod Plus enclosure is waterproof and can be left outside all year around. A clever yet discrete cabling management system keeps all wiring and cables free from moisture.

UV PROTECTED

Made from ABS/ASA with UV-cured protective hard coating, the latest material technology moulded in three sizes and fully UV protected to avoid any dulling, tarnishing and fading.

ANTI -THEFT

Engineered to protect you from tampering, theft or vandalism. Latches can be secured with padlocks to keep the TV/display inside the enclosure secure.

AFFORDABILITY

Put old TVs to good use as an outdoor TV. It's more cost effective to house a regular TV in a TV Pod Plus enclosure than making a long term investment in digital signage, tooling. For a short to medium term solution, using the TV Pod Plus enclosure is the most cost effective solution on the market.

LIGHTWEIGHT

Using a plastic material means the units are light in weight starting from 10kgs compared to traditional metal units

PERFORMANCE

Audio and visual experience unaffected when in use. Simply remove front case, plug and play.

MADE IN THE UK

We are proud to say we make this product in the UK which ensures we have the best quality control.

AFFORDABILITY

Put old TVs to good use as an outdoor TV or display. It's more cost-effective to house a regular TV in a TV Pod Plus enclosure than making a long term investment in bespoke digital signage. For a short to medium term solution, using the TV Pod Plus enclosure is the most cost-effective outdoor solution on the market.

ROBUST AND DURABLE

The back case is made from ABS/ASA (PV) rendering it high impact, scratch and UV resistant with a professional sleek finish.

FULLY SEALED WATERPROOF POD

The sealed TV Pod Plus enclosure is waterproof and can be left outside all year around. A clever yet discrete cabling management system keeps all wiring and cables free from moisture.

UV PROTECTED

Made from ABS/ASA with UV-cured protective hard coating, the latest material technology moulded in three sizes and fully UV protected to avoid any dulling, tarnishing and fading.

VANDAL PROOF

The polycarbonate front screen for ultimate durability, acts as a protective barrier for the enclosed TV which is shatter-resistant, ultra clear and anti-glare properties.

TEMPERATURE CONTROL

Optional temperature control system accessory to manage the internal TV Pod Plus temperature, protecting the TV all year round.

ANTI -THEFT

Built with tamper-proof security screws to secure the TV inside the enclosure and engineered for protection against tampering, theft or vandalism.

ANTI-GLARE SCREEN

Anti-glare optically enhanced polycarbonate.

THE BRITISH RACING DRIVERS CLUB CASE STUDY

The British Racing Drivers' Club is arguably, the most exclusive club in motor racing. Home to the most successful racing from Great Britain and the Commonwealth. Those who have met the entry criteria have achieved the highest levels of the sport or made a significant contribution to enable others to do so.

The club has been responsible for developing Silverstone into a world class motor sport venue and promoting top flight motor sport there for approaching 60 years.

ProofVision have had the absolute pleasure of supplying the club with one of our very own outdoor TV's Lifestyle Range.

Luke Evans BRDC Club Operations says "Access to the BRDC Clubhouse at Silverstone Circuit is a privilege enjoyed only by a select few. With some of the best views of the circuit from the Clubhouse roof, our members and guests are given a truly engaging experience when the cars dive into Brooklands, hug the apex at Luffield and scream out of Woodcote. For the remainder of the lap of Silverstone, spectators rely heavily on the television picture and with the overall brightness of the terrace intensified by our white canopy roof, it is essential to make sure the screens in the area are fit for purpose. Over the weekend of the 2018 Formula One Rolex British Grand Prix, the 700cd/m2 43" Lifestyle Outdoor TV by ProofVision performed exceptionally well and represented the racing action in absolute clarity. The results when coupled with a HD feed were absolutely stunning, a huge improvement to the indoor TV screen inside a waterproof box solution that we had implemented previously."

ProofVision CEO William Uttley says "Myself and the team down here at ProofVision HQ are extremely proud and honoured to be able to provide one of our products to such a prestigious and historical club."

THE CONSTITUTION PUB CASE STUDY

The Constitution Pub is one of north London's most beloved pubs. Boasting its location overlooking the Regents Canal. The Constitution Pub remains one of the most traditional English pubs in Camden. There is always a warm welcome at The Constitution Pub.

Offering pool and dart board facilities the pub also has an outstanding beer garden which has previously won awards for best beer garden in the 'Camden in Bloom' and 'London in Bloom' competitions.

The pub offers Sky Sports and BT Sports and to enhance the viewing of these have recently installed a ProofVision outdoor screen in their beer garden.

Martin Ashley from The Constitution Pub commented,

"A big proportion of our customers are sports fans and it's been a real pleasure to provide them with new exciting ways for them to enjoy their favourite games. The ProofVision outdoor screen has been a real hit and we've seen an increase in numbers through the door. Also, the quality of the screen has been excellent. Thanks, ProofVision."

SUPER YACHT CASE STUDY

Our outdoor models are designed for any sort of environment, and what better place to have a ProofVision outdoor TV than the sun deck of luxury yacht ULYSSES.

Owain Rowlands, first officer on board Ulysses offered the following comment "After dealing with several outdoor TVs it is nice to have peace of mind after installing ProofVision's. The TV sits in all weathers in one of the worst environments and we are very happy with its performance."

The ProofVision outdoor TVs have been a very popular part of what we offer due to their ability to withstand all weathers and temperatures.

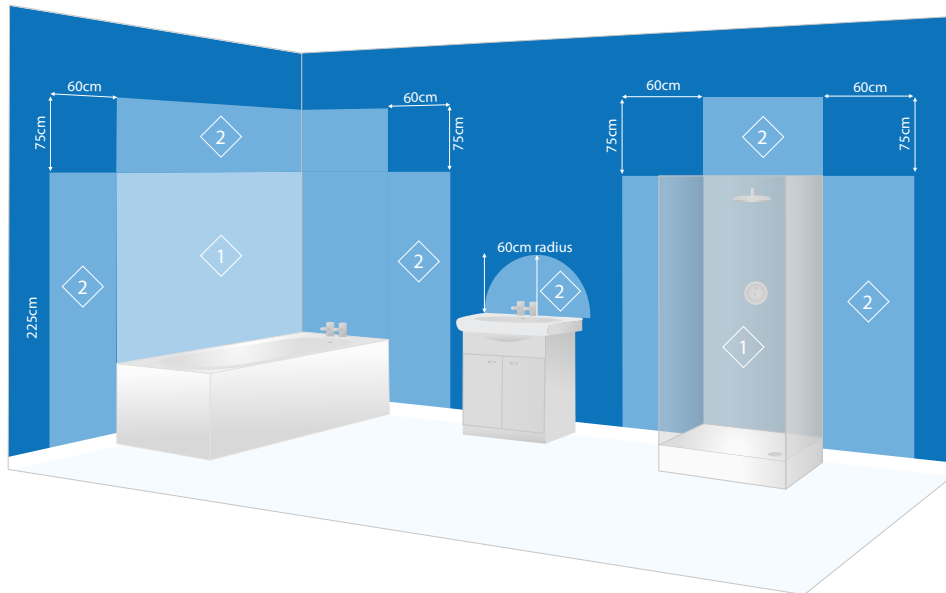

William Uttley, Managing Director of ProofVision notes "We are experiencing a strong increase in demand for our outdoor range within the luxury yacht industry, as owners are starting to recognise the demonstrable quality of our TVs in comparison to others on the market."

FAQS

Are ProofVision products safe in wet environments?

Yes. The Bathroom TVs are IP65 rated which allows them to be installed in Zone 1 (see the diagram below). Our Outdoor TVs are also IP65 rated and can be left outside all year round in temperatures ranging from -20 to 60 degrees Celsius.

What's the difference between our Premium and Professional Bathroom TVs?

Our Premium Bathroom TVs come in a variety of sizes and finishes with a high specification suitable for new bathroom installation projects. The same high specification can be found in our Professional Bathroom TVs however, they also have RS232 ideal for home automation projects.

What does the Made in Britain mark represent?

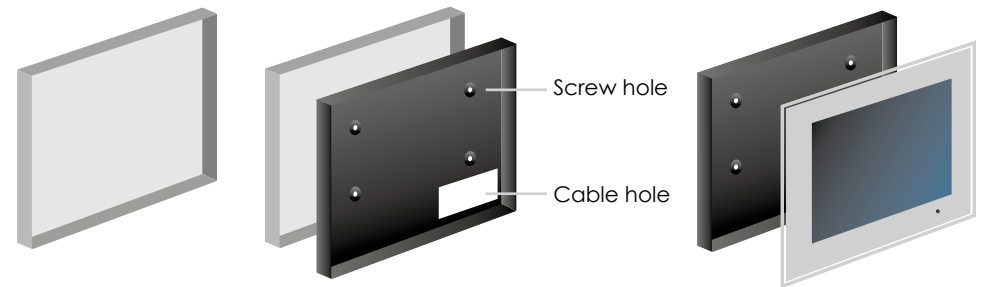

The Made in Britain mark is applicable to our Bathroom TV ranges and our Outdoor Durascreen range. It means that we part-assemble these products in the UK.

Are ProofVision products easy to install?

Yes. All our products have been designed with ease of installation in mind.

How do I install the Bathroom TVs?

The Bathroom TVs are to be installed with the use of the first fix installation kit (a black plate frame and power cable) included with each TV. The black plate frame and power cable are to be installed first, which allows the TV to drop into place within the frame. The frame is then to be sealed with a silicon sealant within the bathroom wall (see the diagram below for further information).

How do I install the Outdoor TVs?

The Outdoor TVs can be installed like any other TV - they have standard VESA holes in the back of the unit so can be mounted in the same way. There is an easy-to-access sealed connection for waterproofing the connection area. Please see the photo below for more information.

What happens if my customers' need help with their product?

We have an experienced and friendly customer service team **+44 (0) 203 4111 693** that are available Monday to Friday, 9am-5.30pm to answer any queries they may have.
